

Model: PT2

## 4-Event Timer & Clock

### Kitchen Measurement Tools

Counts 100 hours by hr/min/sec

CDN updates its precision timer line with the new 4-Event Timer & Clock (PT2), offering 4 channels with individual channel sounds that count up or down separately or simultaneously. This dual-function timer counts 100 hours up or down by hours, minutes and seconds, with stop and restart controls and last count recall. The loud and long alarms keep the cook informed, and the pocket clip, magnet and stand mounting options provide versatile placement. The timer also functions as a clock.
