Models B-3, B-3WL, & B-3WR

Model B-3
(Decanters sold separately)

Model B-3WL
(Also available with right side warmers: B-3WR)
(Decanters sold separately)

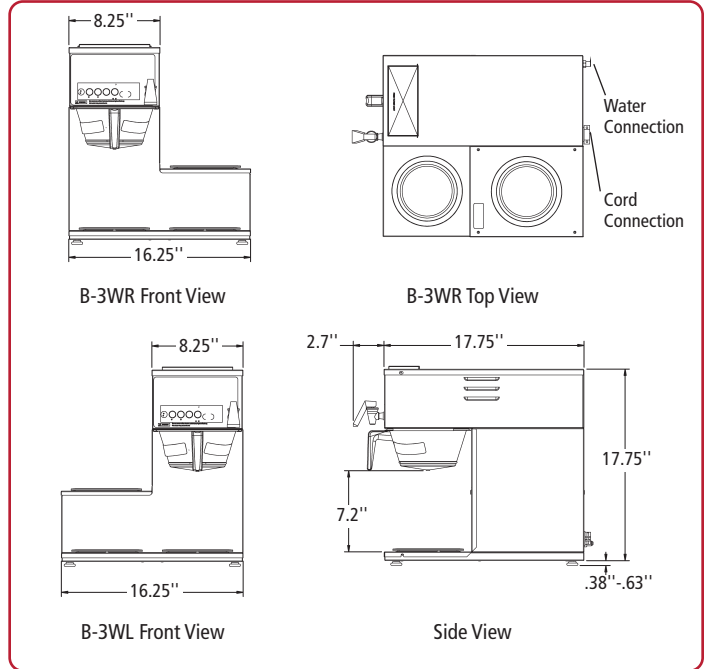

Features

- Model B-3 is a single, digitally controlled brewer. It has one warmer under the brew basket and two warmers on top (Decanters sold separately).
- Model B-3WR is a single, digitally controlled brewer. It has one warmer under the brew basket and two warmers on the right side (Decanters sold separately).
- Model B-3WL is a single, digitally controlled brewer. It has one warmer under the brew basket and two warmers on the left side (Decanters sold separately).
- Precise Brew Temperature - The brewer will hold the brew temperature to +/- 1°F during the complete brew cycle.
- Brew Volume - Can be set by 'teach' mode to eliminate trial-and-error set-up.
- Pulse brewing/pre-infusion - Allows the brew sequence to extract up to 20% more dissolved solids per batch of coffee. Programmable: number of pulses, pulse-on time and pulse-off time. Changing the pulse sequence does not affect the brew volume.
- Low Temp/No Brew - Allows the brew cycle to begin only when the water has reached the optimum brew temperature.
- Cycle Counter - The brewer counts the total number of brew cycles.
- Programming Lock-Out - The brewer settings can be "locked" to prevent tampering.
- Energy Savings/Coffee Old - The warmers can be programmed to shut off up to 240 minutes from the last brew cycle.
- Pour-Over Capability - Automatically converts to pour-over mode when the inlet valve does not sense water. Also capable of being manually set to pour-over mode through the front.
- Dual Voltage with toggle switch models are available to accept 120/240V or 120V supply.
