## **Power Filter Machines**

## for fryer oil capacities up to 200 lbs

Model MOD 0640 with Drain Down Filter for fryers with drain valves

# Models MOD & MOS

**Dual Function** 

### Filter Machine & Discard Trolley

High Performance · High Reliability · High Mobility

- Full ½ hp heavy duty, high volume electric pump
   Pumps oil from 5 to 10 gpm
- High mobility, rugged, stainless oil basin for safe transport of hot oil
  Fitted with removable, hinged, safety splash lid
  Moves easily over uneven surfaces on 8 inch wheels
  Fits under fryer valves with low clearance (See dimension "B")
- High performance EZ Flow<sup>™</sup> filter
   6 month filter life insures low filtering cost
- Width of mobility basin is only 11.7" to function as a simple & reliable replacement for many fryers' built-in filter machines

#### Selecting the correct filter machine for a fry station

Choose MOD machine & drain down filter for fryers with drain valves
Choose MOS machine & pump out filter for counter top fryers
Choose MOS machine & pump out filter plus a drain down filter for kitchens
with both fryers with drain valves and counter top fryers
