

# TUCKER

SAFETY PRODUCTS INC.

## Ultimate Safety.... Approved for Foodservice

**Maximum Safety**  
The ultimate in wearer protection from multiple heat sources, wet and dry.

**Maximum Sanitation**  
Poly-Cotton Protective Products with our VaporGuard® barrier can be machine washed to prevent soil build up, reduce the risk of cross contamination, and maximize product life cycle. Liner can be removed for washing and drying separately.

**Maximum Service**  
We design industry-leading products that can be trusted and that offer effective personal protection against burns or cuts throughout foodservice operations. We offer a one-year warranty against manufacturer's defects. If our customers are not 100% satisfied, we will work with them until they are.

**Maximum Savings**  
The removable liner ensures full life cycle by allowing removal, cleaning, and drying of the liner alone. The mitts last 10 times longer than traditional cotton quilted oven products.

## Poly-Cotton Conventional-Style Oven Mitt with Removable Liner

**ITEM #:**  
56129, 56159, 56189, 56249

**SIZE:**  
Medium  
(additional sizes available upon request)

**DESCRIPTION:**  
Poly-Cotton Conventional-Style Oven Mitt with Removable Liner

**PACK SIZE:**  
1 each

### SPECIFICATION:

Poly-Cotton Conventional-Style Oven Mitt: Tucker Safety Products *BurnGuard®* Item #\_\_\_\_\_. Material: Poly-Cotton (color red). *GussetGuard™* reinforcement. Standard size: Medium (additional sizes available upon request). Standard lengths: 12", 15", 18", and 24". Outer shell fabric permanently bonded with flame resistant, effective liquid and vapor barrier, that will not lose its protective qualities if exposed to 500°F (260°C) for 24 continuous hours. Insulation: 100% cotton terry that has been scoured, tumbled dry and heat set to eliminate 97% of shrinkage; designed to handle 450°F (232°C)\*. Must be certified by NSF and meet NSF protocol # 96/011/480/2480 testing requirements for Class I oven mitts (thermal protection, an effective liquid/vapor barrier, durability, and cleanability).

\* Insulation threshold levels as determined by NSF P149 & EN407 testing standards, which will prove a "not less than 15 seconds to discomfort".
