### SPECIFICATION:

Whizard® Metal Mesh Hand Glove: Tucker Safety Products Item # \_\_\_\_\_. Cut resistant glove construction to be 100% stainless steel made with 4mm ring using 0.5mm wire; Patented self-adjusting tensioning system on wrist with no fabric fastenings; Double interlocked mesh formed using micro plasma welding technique for hermetically sealed ring connections. Ambidextrous. Every Whizard® Metal Mesh glove comes with metal tag with a serial number for tracking, resissuance and sizing information.

### USE / CARE:

Remove all large particles. Wash by hand or with a glove tumbler in warm water with acid and chlorine free detergent or soap. Water temperature should not exceed 125°F (52°C). Rinse in cold water. Hang to air dry. Do not tumble dry. Do not hit gloves against a hard object or surface. Heat and excessive force can damage the metal.

<b>Ring Tensile Strength:</b>	200 Newton	<b>Wire:</b>	0.5mm
<b>Seams:</b>	4 link assembly	<b>Ring:</b>	4mm ring
<b>Weld:</b>	Plasma	<b>Material:</b>	AIISI 304L

#### MAXIMUM SAFETY

Each ring in the double interlocked mesh design is formed using innovative, state of the art micro plasma welding techniques, resulting in stronger, smoother, hermetically sealed ring connections that have no gaps or weak spots. Our patented Steel Tension Spring-System is a self-adjusting wrist fastening system for easier fit and easy on/off.

#### MAXIMUM SANITATION

Whizard® Metal Mesh gloves are lower risk since they do not have fabric straps that can become contaminated and harbor bacteria; The micro plasma welded rings are designed for easy cleaning without residue, unlike resistance welded mesh rings that have gaps and weak spots that trap food debris and soil.

#### MAXIMUM SERVICE

Every Whizard® Metal Mesh glove comes with a metal, color coded barcode serial number tag, which helps with re-issuance, inventory control and sizing information.

#### MAXIMUM SAVINGS

Whizard® Metal Mesh gloves require fewer repairs over time due to extended durability and are less expensive to repair; lighter weight design reduces risk of workers' compensation cost(s).
