

AeroGlove® Automated Glove Dispensing System

FAST • EASY • CLEAN

A quick, secure, sanitary and touch-free glove dispensing system

AeroGlove is an automated touch-free dispenser with motion sensor technology to efficiently and effortlessly put on poly gloves. Patented air dispensing unit expands the poly glove so users simply slide in their hands. Bare hands never touch the outer glove surface so there's no need for additional hand washing prior to glove use. Saves time and money reducing labor, soap, water & paper towel costs. Promotes safe & sanitary service.

AeroGlove Uses

- Food Prep & Service
- Janitorial & Maintenance
- Delis & Bakeries
- Meat & Fish Counters
- Housekeeping
- Self-Service Areas
- Cafeterias & Catering
- Restrooms & Wash Stations
- High-Traffic Locations

Use vertically or horizontally
in prep and service areas

Place on countertops for quick & easy portability. Mount on wall vertically or horizontally or place on a pedestal for front of the house use. Operates with batteries or wall power adapter for maximum versatility. Gloves are available in clear only and are fully biodegradable.

Use on pedestal stand for easy mobility
